CR GEMS Lab-Grown Diamond

*Details Make Perfect*

### *Yellow Rough Diamond*

Weight: 0.2-6.5ct  
Clarity: VVS-SI mixed

The yellow diamond has bright and dazzling color, which looks noble and elegant.

By simulating the growth of natural diamond underground of HTHP conditions, the property of lab-grown diamond is the same as natural diamond.

### *White Rough diamond*

Weight: 0.2-6.5ct  
Color: D、E、F、G.  
Clarity: VVS-SI mixed

The crystal is in hexa-octahedral shape, excellent purity. Its chemical content, structure, and physical property are the same as natural diamond.

Pure and transparent, the diamond could be used for diamond rings, earrings, and necklace, etc.

### *Blue Rough Diamond*

Weight: 0.2-6.5ct  
Clarity: VVS-SI mixed

The blue diamond is highly popular due to its color representing freedom and romance.

Blue as ocean, deep and beautiful, the diamond is pure, attractive and dazzling.
